25X1

Approved For Release 2006/04/19 : CIA-RDP83-00415R000100190013-5

[redacted]

4 November 1946

Country: Germany/Russian Zone

Subject: Russian Experimental Stations in Friedrichshagen

25X1

[redacted]

1. A Soviet Navy experimental station at Friedrichshagen (VOA), headed by Colonel Kamin, is developing the Flotim and Vosa No. 143. As developed by the German Navy, this projectile was to be dropped by aircraft, after which it would float and propel itself by the automatic discharge of rockets. There were also plans to catapult the missile from the shore with a range of thirty kilometers.

2. Another experimental station in Friedrichshagen is the Askania factory where automatic pilots (Kurssteuerung für Dreiachsensteuerung) are produced. Some of these devices have already been shipped to the U.S.S.R. Dr. Lertes is the technician in charge of this work.
